Re: Repository for Wilcox Oil Refinery Superfund Site

Dear Ms. Lawrence:

The Wilcox Oil Refinery Site has been proposed to the National Priorities List, (NPL), and will go on the Final List on December 12, 2013. The U. S. Environmental Protection Agency will generate many reports that apply to the site, and need to be available for Public review. We would like to keep a copy of these documents at the Bristow Public Library. This is the standard procedure at Libraries throughout the Country.

One copy of this material will be marked "Do Not Remove-Reference Only" and needs to remain in the repository (which the community may copy) and the other copies should be made available for the public to pick up if they so desire.

If we can be of further service, do not hesitate to call our toll-free number 1-800-533-3508 for the above referenced Superfund Site.

Sincerely yours,

Bill Little
